

## Product Information and Traditional & Alternative Uses

Cabreuva's, a unique member of the sesquiterpenes family, is high in a compound called nerolidol. Which makes it a perfect companion for an essential oil you are looking to increase its absorption and a magnified response. Cabreuva has hormone-like properties with possible action on the hypothalamus and is a potent antibacterial for the h-pylori strand of bacteria making it a perfect support for stomach ulcers.

- 1 **STOMACH ULCERS**
- 2 **FOOD POISONING**
