

Product Information and Traditional & Alternative Uses

Carrot seed essential oil is packed with natural healing properties, which have been used since time by ancient Greeks and Indians. Sadly, this essential oil is one of the most underappreciated and unused oils. It has been used traditionally for its properties as an antiseptic, disinfectant, detoxifying, antioxidant, anticarcinogenic, carminative, depurative, diuretic, emmenagogue, stimulant, cytophylactic, tonic, and vermifuge substance. With so many health benefits it is not hard to see why this should be part of your essential oil collection
