

Product Information and Traditional & Alternative Uses

This unique essential oil is harvested from wild crafted resin in Brazil. Copaiba constituents have been the subject of recent studies and were shown to provide significant anti-inflammatory effect and relieve muscle spasms, contractions or cramps. This element has also been proven to reduce inflammation and infection on the skin, even MRSA, making it a popular choice for the treatment of cuts, bruises, external wounds, and fungal infections.

- 1 **STIMULANT**
- 2 **FUNGAL INFECTION**
- 3 **IMMUNE SYSTEM**
